VISION

Deliver the best quality Paramedical education for the well-being of human race giving special emphasis on early diagnosis for advanced healing and continuous research & development

MISSION

Become a centre of research & teaching excellence and an ultimate leading light to provide / impart value-added education and skills & wisdom in the field of modern paramedical care in order to mould excellent and committed health care professionals for the well-being of the society, nation and the world

GOALS

In an effort to achieve the College's mission, we strive to fulfill the following goals and to assess them on a regular basis to ensure the quality of our programs and services

- General Education – Provide a relevant and coherent general education for all students.
- Developmental Education – Provide developmental education for weak students. Continue to implement approaches that facilitate the progress of students through the developmental sequence. Assess students' success in college level courses.
- Lifelong Learning – Provide courses and programs that encourage lifelong learning and are responsive to the needs of business and industry. Evaluate and update courses and programs, in response to identified needs.
- Resources – Provide the necessary resources to support the institutional mission.

ABOUT THE PROGRAMME

Medical Laboratory Technology is an Allied Health specialty concerned with the diagnosis, treatment and prevention of diseases through clinical laboratory tests. The Medical Laboratory profession can be described as 'behind the scene, behind the cure'. Medical Laboratory Technologists are responsible in diagnosis, prognosis as well as plays a pivot role in prevention of diseases and thus becomes an important arena in the health care system along with other health care professionals.

Ahalia School of Paramedical Sciences (ASPS) offers B.Sc. MLT Program affiliated by Kerala University of Health Sciences (KUHS). The same program is conducted in all the Govt. Medical Colleges in Kerala. BSc. MLT is a four year professional degree in Medical Laboratory Technology. The students are trained theoretically and practically in all the areas of Medical Laboratory Technology. ASPS make sure that the faculties and standards are according to the norms by KUHS. Ahalia offers an eco friendly campus with all the facilities for students. Transport and hostel facilities are incredible to cater both the students from far and near.
